**Universal Lock Adhesive**

PK141

## OVERVIEW

Review entire instruction guide before starting installation.

### **Quick Start Overview:**

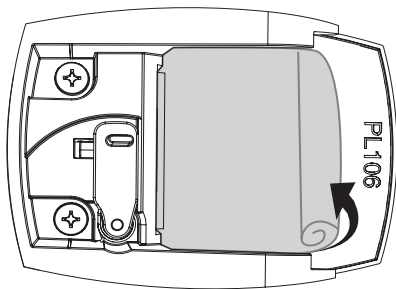

1. Remove Universal Lock from cabinet panel (see Universal Lock Removal Tool Instruction Guide)
2. Remove old adhesive on back of Universal Lock and clean mounting surface
3. Peel tab on replacement adhesive and affix to back of Universal Lock

### **Universal Lock Adhesive Overview:**

This is a replacement adhesive for the Universal Lock.

1

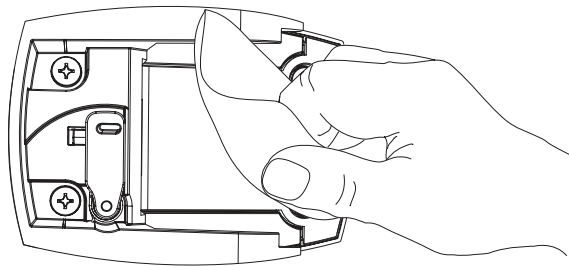

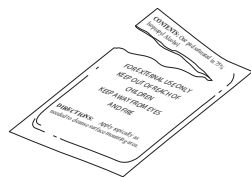

Remove Universal Lock from panel (see Removal Tool Instruction Guide). Peel and roll original adhesive from exposed edge towards center of lock.

CAUTION: Do not use scrapers to remove adhesive. Using tools will fragment adhesive.

2

Clean surface with alcohol wipe provided.

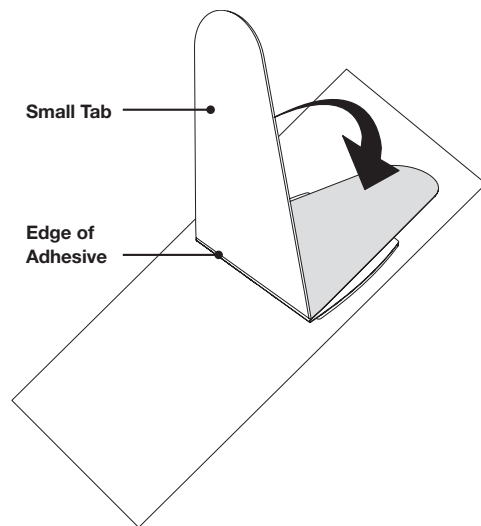

### STOP!

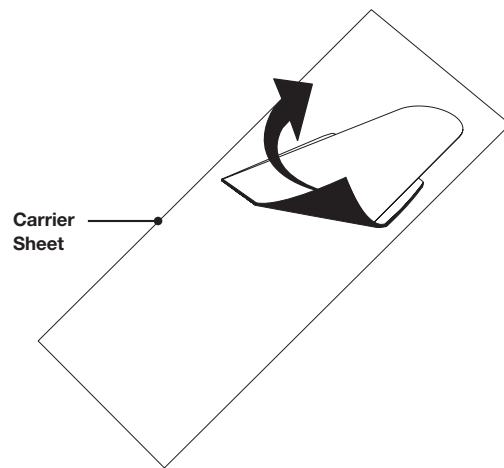

Wait a minimum of 5 minutes or use a clean, lint free cloth to dry alcohol before moving to next step.

**3**

*Fold small tab back 180 degrees and crease at edge of adhesive.*

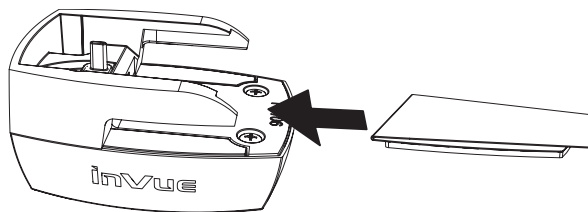

**4**

*Carefully remove adhesive from carrier sheet.*

5

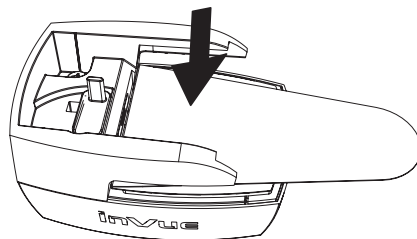

Carefully slide and align new adhesive assembly onto back of Universal Lock.

Note: Do not let exposed adhesive come in contact with lock until fully aligned.

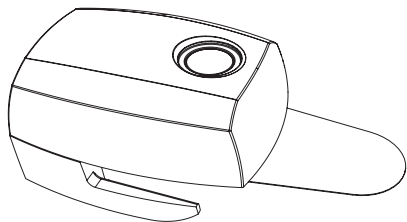

6

Firmly press entire surface of shim to ensure full contact with adhesive. Press down entire surface several times.

7

*Universal Lock is now ready to be reinstalled (see Universal Lock Installation Guide).*
