

Access Manager Software to increase sales and decrease internal theft.

Access Manager software helps increase retailers' profits by reducing internal theft and increasing sales by allowing retailers to confidently put a key in the hands of every associate. The cloud based enterprise system logs OneKEY™ interactions, making it easy to

detect associate activity anytime and anywhere. Using an intuitive user interface, individual associates are enabled with access to the entire store, a department or an individual InVue device. Access Manager works with multiple InVue devices across all security solutions.

OVERVIEW

Profitability

- › Access Manager is a single investment that provides solutions to two significant retailer measurements — store revenue and internal theft
- › When internal theft decreases and store revenues increase, store profits rise

Measurement — Increase Store Revenue

- › OneKEY allows fast and secure store team access to locked merchandise, reducing lost sales due to customer wait times.
- › Associates have more time to assist customers instead of searching for keys, increasing conversion rates.

Measurement — Reduce Internal Theft

- › Internal theft is difficult to identify and track.
- › Access Manager records when keys access merchandise and display devices, providing complete visibility to internal activity.

Auditing & Zoning

- › Customize employee access to the entire store, limiting roles to specific departments or even particular displays.
- › Search and audit key data for a view into all team member activity.

KEY BENEFITS *Cloud Based Data*

- › Data can be accessed anywhere, anytime.
- › Historical data can be accessed easily over time.

System Hierarchy

- › Segment employee interactions by headquarters, division or individual store.
- › Updates can be made easily to the hierarchy.

Store Format(s) Naming

- › All zones and devices are named consistently across the estate.
- › Predetermined zones are defined for specific store formats.

Single Sign On

- › Access Manager permissions at HQ and store.
- › Automatic role assignment at HQ.

Access Manager is offered in two unique plan options:

Access Manager Pro

Access Manager Pro is robust software that ties individual user identification to an activity within the store(s). It provides greater visibility and access control to the sales floor. Users can be quickly added and their permissions modified using the roles feature. The zoning feature creates areas of permission and control within a store and individual departments.

Access Manager Lite

Access Manager Lite is a slimmed down version that delivers insight into the usage of InVue products. It allows a user to view device and key activity within a store(s) with no annual software license fee.

Features	Lite*	Pro*
Analytics dashboard	Limited	✓
Audit activity	✓	✓
Number of keys checked in / out	✓	✓
Number of users	2	Unlimited
Number of stores	Unlimited	Unlimited
Create roles for groups of users		✓
Create zones within a store		✓
Naming and ID of InVue devices	✓	✓
Manager's store report		✓
Export raw data		✓
Time stamp	✓	✓
Annual license	Free	Flat Fee†

* To set up Access Manager Lite and Access Manager Pro, the following items are required: Access Manager Hardware Set Up Kit (one each per location); ethernet port access per location; completion of a SOW and MSA per account. Your sales representative can provide you with the appropriate order codes and document templates.

† The annual software license of Access Manager Pro is based on a simple, flat fee structure per store location. Ask your sales representation for more information.

WHO:

Associate access can be set at different levels.*

**Pro License only*

Store Manager
(The entire store)

Team Member
(One or more departments)

Seasonal Employee
(One or more locks/positions)

HOW:

The OneKEY collects the data that allows Access Manager to share who accessed a position and when.

Associate activity data

KAS connected to network

Data sent to Access Manager cloud storage

Data accessed anywhere, store or corporate

WHERE:

The OneKEY works across all of InVue's major product lines.

Handheld Electronics

Wearables

Electronic Accessories
